Question Set 1

QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Office 365 tenant.

You suspect that several Office 365 features were recently updated.

You need to view a list of the features that were recently updated in the tenant.

Solution: You use the View service requests option in the Microsoft 365 admin center.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

Section: [none]

Explanation

Explanation/Reference:

QUESTION 2

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Office 365 tenant.

You suspect that several Office 365 features were recently updated.

You need to view a list of the features that were recently updated in the tenant.

Solution: You use Dashboard in Security & Compliance.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

Section: [none]

Explanation

Explanation/Reference:

QUESTION 3

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Office 365 tenant.

You suspect that several Office 365 features were recently updated.

You need to view a list of the features that were recently updated in the tenant.

Solution: You use Message center in the Microsoft 365 admin center.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: A

Section: [none]

Explanation

Explanation/Reference:

QUESTION 4

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Office 365 tenant.

You suspect that several Office 365 features were recently updated.

You need to view a list of the features that were recently updated in the tenant.

Solution: You review the Security & Compliance report in the Microsoft 365 admin center.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

Section: [none]

Explanation

Explanation/Reference:

QUESTION 5

You recently migrated your on-premises email solution to Microsoft Exchange Online and are evaluating which

licenses to purchase.

You want the members of two groups named IT and Managers to be able to use the features shown in the following table.

Feature	Available to
Microsoft Azure Active Directory (Azure AD) conditional access	IT group, Managers group
Microsoft Azure Active Directory (Azure AD) Privileged Identity Management	IT group

The IT group contains 50 users. The Managers group contains 200 users.

You need to recommend which licenses must be purchased for the planned solution. The solution must minimize licensing costs.

Which licenses should you recommend?

- A. 250 Microsoft 365 E3 only
- B. 50 Microsoft 365 E3 and 200 Microsoft 365 E5
- C. 250 Microsoft 365 E5 only
- D. 200 Microsoft 365 E3 and 50 Microsoft 365 E5

Correct Answer: D

Section: [none]

Explanation

Explanation/Reference:

QUESTION 6

You have a Microsoft 365 tenant that contains Microsoft Exchange Online.

You plan to enable calendar sharing with a partner organization named adatum.com. The partner organization also has a Microsoft 365 tenant.

You need to ensure that the calendar of every user is available to the users in adatum.com immediately.

What should you do?

- A. From the Exchange admin center, create a sharing policy.
- B. From the Exchange admin center, create a new organization relationship.
- C. From the Microsoft 365 admin center, modify the Organization profile settings.
- D. From the Microsoft 365 admin center, configure external site sharing.

Correct Answer: B

Section: [none]

Explanation

Explanation/Reference:

<https://docs.microsoft.com/en-us/exchange/sharing/organization-relationships/create-an-organization-relationship>

QUESTION 7

DRAG DROP

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com.

You purchase a domain named contoso.com from a registrar and add all the required DNS records.

You create a user account named User1. User1 is configured to sign in as user1@contoso.onmicrosoft.com.

You need to configure User1 to sign in as user1@contoso.com.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Run Set-MsolDomainAuthentication - TenantID contoso.com	
Modify the email address of User1.	
Modify the username of User1.	
Verify the custom domain.	
Add a contoso.com as a SAN for an X.509 certificate.	
Add a custom domain name.	

Correct Answer:

Actions	Answer Area
Run Set-MsolDomainAuthentication - TenantID contoso.com	Add a custom domain name.
Modify the email address of User1.	Verify the custom domain.
Modify the username of User1.	Modify the username of User1.
Verify the custom domain.	
Add a contoso.com as a SAN for an X.509 certificate.	
Add a custom domain name.	

Section: [none]

QUESTION 8

Your company has an on-premises Microsoft Exchange Server 2016 organization and a Microsoft 365 Enterprise subscription.

You plan to migrate mailboxes and groups to Exchange Online.

You start a new migration batch.

Users report slow performance when they use the on-premises Exchange Server organization.

You discover that the migration is causing the slow performance.

You need to reduce the impact of the mailbox migration on the end-users.

What should you do?

- A. Create a mailbox rule.
- B. Configure back pressure.
- C. Modify the migration endpoint settings.
- D. Create a throttling policy.

Correct Answer: C

Section: [none]

Explanation

Explanation/Reference:

Explanation:

You can reduce the maximum number of concurrent mailbox migrations.

QUESTION 9

You have a Microsoft 365 subscription.

You need to prevent phishing email messages from being delivered to your organization.

What should you do?

- A. From the Exchange admin center, create an anti-malware policy.
- B. From Security & Compliance, create a DLP policy.
- C. From Security & Compliance, create a new threat management policy.
- D. From the Exchange admin center, create a spam filter policy.

Correct Answer: C

Section: [none]

Explanation

Explanation/Reference:

References:

<https://docs.microsoft.com/en-us/office365/securitycompliance/set-up-anti-phishing-policies>

QUESTION 10

Your company has a Microsoft 365 subscription. All identities are managed in the cloud.

The company purchases a new domain name.

You need to ensure that all new mailboxes use the new domain as their primary email address.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. From Microsoft Exchange Online PowerShell, run the `Update-EmailAddressPolicy policy` command.
- B. From the Exchange admin center, click **mail flow**, and then configure the email address policies.
- C. From the Microsoft 365 admin center, click **Setup**, and then configure the domains.
- D. From Microsoft Exchange Online PowerShell, run the `Set-EmailAddressPolicy policy` command.
- E. From the Azure Active Directory admin center, configure the custom domain names.

Correct Answer: BD

Section: [none]

Explanation

Explanation/Reference:

QUESTION 11

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that includes the users shown in the following table.

Name	Usage location	Membership
User1	United States	Group1, Group2
User2	<i>Not applicable</i>	Group2
User3	<i>Not applicable</i>	Group1
User4	Canada	Group1

Group2 is a member of Group1.

You assign a Microsoft Office 365 Enterprise E3 license to Group1.

You need to identify how many Office 365 E3 licenses are assigned.

What should you identify?

- A. 1
- B. 2
- C. 3
- D. 4

Correct Answer: C

Section: [none]

Explanation

Explanation/Reference:

QUESTION 12

You have a Microsoft 365 subscription.

A new corporate security policy states that you must automatically send DLP incident reports to the users in the

legal department.

You need to schedule the email delivery of the reports. The solution must ensure that the reports are sent as frequently as possible.

How frequently can you share the reports?

- A. hourly
- B. monthly
- C. weekly
- D. daily

Correct Answer: C

Section: [none]

Explanation

Explanation/Reference:

QUESTION 13

Your company has a Microsoft 365 subscription.

You need to identify all the users in the subscription who are licensed for Microsoft Office 365 through a group membership. The solution must include the name of the group used to assign the license.

What should you use?

- A. the Licenses blade in the Azure portal
- B. Reports in the Microsoft 365 admin center
- C. Active users in the Microsoft 365 admin center
- D. Report in Security & Compliance

Correct Answer: A

Section: [none]

Explanation

Explanation/Reference:

QUESTION 14

Your company has a Microsoft 365 subscription.

You upload several archive PST files to Microsoft 365 by using the Security & Compliance admin center.

A month later, you attempt to run an import job for the PST files.

You discover that the PST files were deleted from Microsoft 365.

What is the most likely cause of the files being deleted? More than one answer choice may achieve the goal. Select the **BEST** answer.

- A. The PST files were corrupted and deleted by Microsoft 365 security features.
- B. PST files are deleted automatically from Microsoft 365 after 30 days.
- C. The size of the PST files exceeded a storage quota and caused the files to be deleted.
- D. Another administrator deleted the PST files.

Correct Answer: B
Section: [none]
Explanation

Explanation/Reference:

<https://docs.microsoft.com/en-us/office365/securitycompliance/faqimporting-pst-files-to-office-365>

QUESTION 15

Your company has a main office and 20 branch offices in North America and Europe. Each branch office connects to the main office by using a WAN link. All the offices connect to the Internet and resolve external host names by using the main office connections.

You plan to deploy Microsoft 365 and to implement a direct Internet connection in each office.

You need to recommend a change to the infrastructure to provide the quickest possible access to Microsoft 365 services.

What is the best recommendation to achieve the goal? More than one answer choice may achieve the goal. Select the **BEST** answer.

- A. For all the client computers in the branch offices, modify the MTU setting by using a Group Policy object (GPO).
- B. In each branch office, deploy a proxy server that has user authentication enabled.
- C. In each branch office, deploy a firewall that has packet inspection enabled.
- D. In each branch office, configure name resolution so that all external hosts are redirected to public DNS servers directly.

Correct Answer: D
Section: [none]
Explanation

Explanation/Reference:

QUESTION 16

Your network contains an Active Directory forest named adatum.local. The forest contains 500 users and uses adatum.com as a UPN suffix.

You deploy a Microsoft 365 tenant.

You implement directory synchronization and sync only 50 support users.

You discover that five of the synchronized users have usernames that use a UPN suffix of onmicrosoft.com.

You need to ensure that all synchronized identities retain the UPN set in their on-premises user account.

What should you do?

- A. From the Microsoft 365 admin center, add adatum.com as a custom domain name.
- B. From Windows PowerShell, run the `Set-ADDomain -AllowedDNSSuffixes adatum.com` command.
- C. From Active Directory Users and Computers, modify the UPN suffix of the five user accounts.
- D. From the Microsoft 365 admin center, add adatum.local as a custom domain name.

Correct Answer: C
Section: [none]
Explanation

Explanation/Reference:

QUESTION 17

HOTSPOT

Your company has a Microsoft Office 365 subscription that contains the groups shown in the following table.

Name	Members
Group1	User1, User2
Group2	User3

You have the licenses shown in the following table.

License	Included service	Assigned to
Microsoft 365	Microsoft Exchange Online	Group1
Microsoft 365	Microsoft SharePoint Online	User1, User2, User3

Another administrator removes User1 from Group1 and adds Group2 to Group1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
User1 is licensed for SharePoint Online.	<input type="radio"/>	<input type="radio"/>
User2 is licensed for SharePoint Online.	<input type="radio"/>	<input type="radio"/>
User3 is licensed for SharePoint Online.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statements	Yes	No
User1 is licensed for SharePoint Online.	<input checked="" type="radio"/>	<input type="radio"/>
User2 is licensed for SharePoint Online.	<input checked="" type="radio"/>	<input type="radio"/>
User3 is licensed for SharePoint Online.	<input checked="" type="radio"/>	<input type="radio"/>

Section: [none]

Explanation

Explanation/Reference:

Explanation:

The users are assigned SharePoint licenses directly. Their group memberships have no effect on licenses directly assigned to the user accounts.

QUESTION 18

Your company has on-premises servers and a Microsoft Azure Active Directory (Azure AD) tenant.

Several months ago, the Azure AD Connect Health agent was installed on all the servers.

You review the health status of all the servers regularly.

Recently, you attempted to view the health status of a server named Server1 and discovered that the server is **NOT** listed on the Azure Active Directory Connect Servers list.

You suspect that another administrator removed Server1 from the list.

You need to ensure that you can view the health status of Server1.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. From Windows PowerShell, run the `Register-AzureADConnectHealthSyncAgent` cmdlet.
- B. From Azure Cloud shell, run the `Connect-AzureAD` cmdlet.
- C. From Server1, change the Azure AD Connect Health services Startup type to **Automatic (Delayed Start)**.
- D. From Server1, change the Azure AD Connect Health services Startup type to **Automatic**.
- E. From Server1, reinstall the Azure AD Connect Health agent.

Correct Answer: AE

Section: [none]

Explanation

Explanation/Reference:

QUESTION 19

You have a Microsoft 365 subscription.

You suspect that several Microsoft Office 365 applications or services were recently updated.

You need to identify which applications or services were recently updated.

What are two possible ways to achieve the goal? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. From the Microsoft 365 admin center, review the Message center blade.
- B. From the Office 365 Admin mobile app, review the messages.
- C. From the Microsoft 365 admin center, review the Products blade.
- D. From the Microsoft 365 admin center, review the Service health blade.

Correct Answer: AB

Section: [none]

QUESTION 20

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has a Microsoft Office 365 tenant.

You suspect that several Office 365 features were recently updated.

You need to view a list of the features that were recently updated in the tenant.

Solution: You use **Monitoring and reports** from the Compliance admin center.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

Section: [none]

Explanation

Explanation/Reference:

QUESTION 21

DRAG DROP

Your network contains an on-premises Active Directory domain named contoso.com that is synced to a Microsoft Azure Active Directory (Azure AD) tenant. The on-premises domain contains a server named Server1 that runs Windows Server 2016 and 200 client computers that run Windows 10.

Your company purchases a Microsoft 365 subscription.

On Server1, you create a file share named Share1. You extract the Microsoft Office Deployment Tool (ODT) to Share1.

You need to deploy Office 365 ProPlus, and the French language pack from Share1 to the Windows 10 computers.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Create an XML configuration file.

On Server1, run `setup.exe` and specify the `/configure` parameter.

On every client computer, run `setup.exe` and specify the `/configure` parameter.

On Server1, run `setup.exe` and specify the `/package` parameter.

On every client computer, run `setup.exe` and specify the `/download` parameter.

On Server1, run `setup.exe` and specify the `/download` parameter.

Answer Area**Correct Answer:****Actions**

On Server1, run `setup.exe` and specify the `/configure` parameter.

On Server1, run `setup.exe` and specify the `/package` parameter.

On every client computer, run `setup.exe` and specify the `/download` parameter.

Answer Area

On Server1, run `setup.exe` and specify the `/download` parameter.

Create an XML configuration file.

On every client computer, run `setup.exe` and specify the `/configure` parameter.

Section: [none]**Explanation****Explanation/Reference:**

Explanation:

Note:

Step 1: Create an XML configuration file with the source path and download path for the installation files.

Step 2: On the deployment server, run the ODT executable in download mode and with a reference to the XML configuration file.

Step 3: Create another XML configuration file with the source path to the installation files.

Step 4: On the client computer, run the ODT executable in configure mode and with a reference to the XML configuration file.

<https://docs.microsoft.com/en-us/office365/securitycompliance/data-loss-prevention-policies>

QUESTION 29

In Microsoft 365, you configure a data loss prevention (DLP) policy named Policy1. Policy1 detects the sharing of United States (US) bank account numbers in email messages and attachments.

Policy1 is configured as shown in the exhibit. (Click the **Exhibit** tab.)

Use actions to protect content when the conditions are met.

Restrict access or encrypt the content

- ☒ Block people from sharing and restrict access to shared content
By default, users are blocked from sending email messages to people. You can choose who has access to shared SharePoint and OneDrive content.
Block these people from accessing SharePoint and OneDrive content
 - ☐ Everyone. Only the content owner, the lastmodifier, and the site admin will continue to have access.
 - ☒ Only people outside your organization. People inside your organization will continue to have access.
 - ☐ Encrypt email messages (applies only to content to Exchange)

You need to ensure that internal users can email documents that contain US bank account numbers to external users who have an email suffix of contoso.com.

What should you configure?

NoOne

- A. an action
- B. a group
- C. a condition
- D. an exception

Correct Answer: A

Section: [none]

QUESTION 30

Your company uses on-premises Windows Server File Classification Infrastructure (FCI). Some documents on the on-premises file servers are classified as Confidential.

You migrate the files from the on-premises file servers to Microsoft SharePoint Online.

You need to ensure that you can implement data loss prevention (DLP) policies for the uploaded files based on the Confidential classification.

What should you do first?

- A. From the SharePoint admin center, create a managed property.
- B. From the SharePoint admin center, configure hybrid search.
- C. From the Security & Compliance Center PowerShell, run the `New-DlpComplianceRule` cmdlet.
- D. From the Security & Compliance Center PowerShell, run the `New-DataClassification` cmdlet.

Correct Answer: C

QUESTION 31

HOTSPOT

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com.

You have three applications App1, App2, App3. The Apps use files that have the same file extensions.

Your company uses Windows Information Protection (WIP). WIP has the following configurations:

- Windows Information Protection mode: Silent
- Protected apps: App1
- Exempt apps: App2

From App1, you create a file named File1.

What is the effect of the configurations? To answer, select the appropriate options in the answer area.

Hot Area:

Answer Area

You can open File1 from:

	✓
App1 only	
App1 and App2 only	
App1 and App3 only	
App1, App2, and App3	

An action will be logged when you attempt to open File1 from:

	✓
App1 only	
App3 only	
App1 and App2 only	
App2 and App3 only	
App1, App2, and App3	

Correct Answer:

Answer Area

You can open File1 from:

	✓
App1 only	
App1 and App2 only	
App1 and App3 only	
App1, App2, and App3	

An action will be logged when you attempt to open File1 from:

QUESTION 32

Your company has 10 offices.

The network contains an Active Directory domain named contoso.com. The domain contains 500 client computers. Each office is configured as a separate subnet.

You discover that one of the offices has the following:

- Computers that have several preinstalled applications
- Computers that use nonstandard computer names
- Computers that have Windows 10 preinstalled
- Computers that are in a workgroup

You must configure the computers to meet the following corporate requirements:

- All the computers must be joined to the domain.
- All the computers must have computer names that use a prefix of CONTOSO.
- All the computers must only have approved corporate applications installed.

You need to recommend a solution to redeploy the computers. The solution must minimize the deployment time.

- A. a provisioning package
- B. wipe and load refresh
- C. Windows Autopilot
- D. an in-place upgrade

Correct Answer: A

Section: [none]

Explanation

Explanation/Reference:

Explanation:

By using a Provisioning, IT administrators can create a self-contained package that contains all of the configuration, settings, and apps that need to be applied to a device.

Incorrect Answers:

C: With Windows Autopilot the user can set up pre-configure devices without the need consult their IT administrator.

D: Use the In-Place Upgrade option when you want to keep all (or at least most) existing applications.

QUESTION 33

You have a Microsoft 365 subscription.

You recently configured a Microsoft SharePoint Online tenant in the subscription.

You plan to create an alert policy.

You need to ensure that an alert is generated only when malware is detected in more than five documents stored in SharePoint Online during a period of 10 minutes.

What should you do first?

- A. Enable Microsoft Office 365 Cloud App Security.
- B. Deploy Windows Defender Advanced Threat Protection (Windows Defender ATP).
- C. Enable Microsoft Office 365 Analytics.

Correct Answer: B

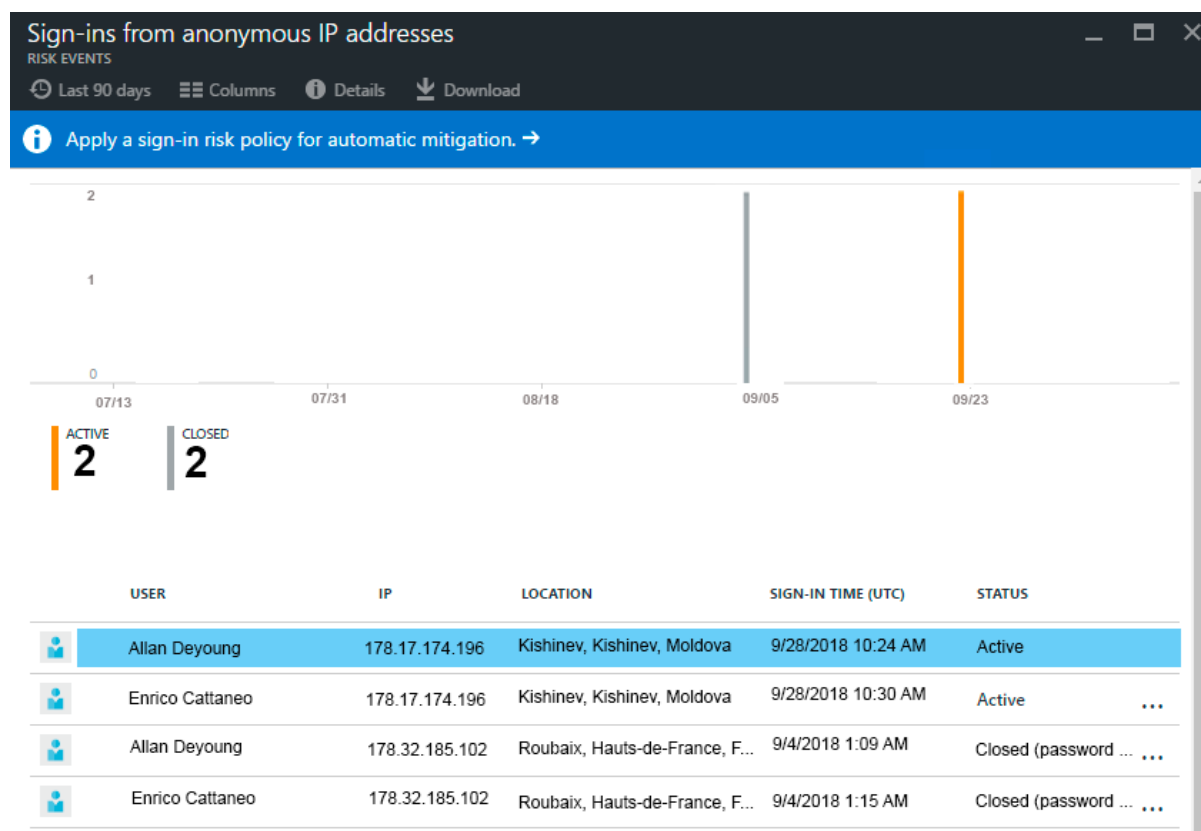

Section: [none]

Explanation

Explanation/Reference:

QUESTION 34

From the Microsoft Azure Active Directory (Azure AD) Identity Protection dashboard, you view the risk events shown in the exhibit. (Click the **Exhibit** tab.)

You need to reduce the likelihood that the sign-ins are identified as risky.

What should you do?

- A. From the Security & Compliance admin center, add the users to the Security Readers role group.
- B. From the Conditional access blade in the Azure Active Directory admin center, create named locations.
- C. From the Azure Active Directory admin center, configure the trusted IPs for multi-factor authentication.
- D. From the Security & Compliance admin center, create a classification label.

Correct Answer: B

Section: [none]

Explanation

Explanation/Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/location-condition>**QUESTION 35****DRAG DROP**

You have a Microsoft 365 subscription.

You have the devices shown in the following table.

Operating system	Quantity
Windows 8.1	5
Windows 10	5
Windows Server 2016	5

You need to onboard the devices to Windows Defender Advanced Threat Protection (ATP). The solution must avoid installing software on the devices whenever possible.

Which onboarding method should you use for each operating system? To answer, drag the appropriate methods to the correct operating systems. Each method may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Methods	Answer Area
A Microsoft Azure ATP sensor	Windows 8.1: <input type="text"/>
A local script	Windows 10: <input type="text"/>
Microsoft Monitoring Agent	Windows Server 2016: <input type="text"/>

Correct Answer:

Methods	Answer Area
A Microsoft Azure ATP sensor	Windows 8.1: Microsoft Monitoring Agent
A local script	Windows 10: A local script
Microsoft Monitoring Agent	Windows Server 2016: Microsoft Monitoring Agent

QUESTION 37

You have a Microsoft 365 tenant.

You have a line-of-business application named App1 that users access by using the My Apps portal.

After some recent security breaches, you implement a conditional access policy for App1 that uses Conditional Access App Control.

You need to be alerted by email if impossible travel is detected for a user of App1. The solution must ensure that alerts are generated for App1 only.

What should you do?

- A. From Microsoft Cloud App Security, modify the impossible travel alert policy.
- B. From Microsoft Cloud App Security, create a Cloud Discovery anomaly detection policy.
- C. From the Azure Active Directory admin center, modify the conditional access policy.
- D. From Microsoft Cloud App Security, create an app discovery policy.

Correct Answer: B

QUESTION 38

Your network contains an on-premises Active Directory domain.

Your company has a security policy that prevents additional software from being installed on domain controllers.

You need to monitor a domain controller by using Microsoft Azure Advanced Threat Protection (ATP).

What should you do? More than one choice may achieve the goal. Select the **BEST** answer.

- A. Deploy an Azure ATP standalone sensor, and then configure port mirroring.
- B. Deploy an Azure ATP standalone sensor, and then configure detections.
- C. Deploy an Azure ATP sensor, and then configure detections.
- D. Deploy an Azure ATP sensor, and then configure port mirroring.

Correct Answer: D

Testlet 2

This is a case study. **Case studies are not timed separately. You can use as much exam time as you would like to complete each case.** However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answer and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the **Next** button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the **Question** button to return to the question.

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York.

The offices have the users and devices shown in the following table.

Office	Users	Laptops	Desktops	Mobile devices
Montreal	2,500	2,800	300	3,100
Seattle	1,000	1,100	200	1,500
New York	300	320	30	400

Contoso recently purchased a Microsoft 365 E5 subscription.

Existing Environment

The network contains an Active directory forest named contoso.com and a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com.

You recently configured the forest to sync to the Azure AD tenant.

You add and then verify adatum.com as an additional domain name.

All servers run Windows Server 2016.

All desktop computers and laptops run Windows 10 Enterprise and are joined to contoso.com.

All the mobile devices in the Montreal and Seattle offices run Android. All the mobile devices in the New York office run iOS.

Contoso has the users shown in the following table.

Name	Role
User1	<i>None</i>
User2	<i>None</i>
User3	Customer Lockbox access approver
User4	<i>None</i>

Contoso has the groups shown in the following table.

Name	Type	Membership rule
Group1	Assigned	<i>Not applicable</i>
Group 2	Dynamic	(user.department –eq “Finance”)

Microsoft Office 365 licenses are assigned only to Group2.

The network also contains external users from a vendor company who have Microsoft accounts that use a suffix of @outlook.com.

Requirements

Planned Changes

Contoso plans to provide email addresses for all the users in the following domains:

- East.adatum.com
- Contoso.adatum.com
- Humongousinsurance.com

Technical Requirements

Contoso identifies the following technical requirements:

- All new users must be assigned Office 365 licenses automatically.
- The principle of least privilege must be used whenever possible.

Security Requirements

Contoso identifies the following security requirements:

- Vendors must be able to authenticate by using their Microsoft account when accessing Contoso resources.
- User2 must be able to view reports and schedule the email delivery of security and compliance reports.
- The members of Group1 must be required to answer a security question before changing their password.
- User3 must be able to manage Office 365 connectors.
- User4 must be able to reset User3 password.

QUESTION 1

You need to add the custom domain names to Office 365 to support the planned changes as quickly as possible.

What should you create to verify the domain names successfully?

- A. three alias (CNAME) records
- B. one text (TXT) record
- C. one alias (CNAME) record
- D. three text (TXT) records

Correct Answer: D

Section: [none]

Overview

Fabrikam, Inc. is an electronics company that produces consumer products. Fabrikam has 10,000 employees worldwide.

Fabrikam has a main office in London and branch offices in major cities in Europe, Asia, and the United States.

Existing Environment

Active Directory Environment

The network contains an Active Directory forest named fabrikam.com. The forest contains all the identities used for user and computer authentication.

Each department is represented by a top-level organizational unit (OU) that contains several child OUs for user accounts and computer accounts.

All users authenticate to on-premises applications by signing in to their device by using a UPN format of *username@fabrikam.com*.

Fabrikam does **NOT** plan to implement identity federation.

Network Infrastructure

Each office has a high-speed connection to the Internet.

Each office contains two domain controllers. All domain controllers are configured as a DNS server.

The public zone for fabrikam.com is managed by an external DNS server.

All users connect to an on-premises Microsoft Exchange Server 2016 organization. The users access their email by using Outlook Anywhere, Outlook on the web, or the Microsoft Outlook app for iOS. All the Exchange servers have the latest cumulative updates installed.

All shared company documents are stored on a Microsoft SharePoint Server farm.

Requirements

Planned Changes

Fabrikam plans to implement a Microsoft 365 Enterprise subscription and move all email and shared documents to the subscription.

Fabrikam plans to implement two pilot projects:

- Project1: During Project1, the mailboxes of 100 users in the sales department will be moved to Microsoft 365.
- Project2: After the successful completion of Project1, Microsoft Teams & Skype for Business will be enabled in Microsoft 365 for the sales department users.

Fabrikam plans to create a group named UserLicenses that will manage the allocation of all Microsoft 365 bulk licenses.

Technical Requirements

Fabrikam identifies the following technical requirements:

- All users must be able to exchange email messages successfully during Project1 by using their current email address.
- Users must be able to authenticate to cloud services if Active Directory becomes unavailable.
- A user named User1 must be able to view all DLP reports from the Microsoft 365 admin center.
- Microsoft Office 365 ProPlus applications must be installed from a network share only.
- Disruptions to email address must be minimized.

Application Requirements

Fabrikam identifies the following application requirements:

- An on-premises web application named App1 must allow users to complete their expense reports online.
- The installation of feature updates for Office 365 ProPlus must be minimized.

Security Requirements

Fabrikam identifies the following security requirements:

- After the planned migration to Microsoft 365, all users must continue to authenticate to their mailbox and to SharePoint sites by using their UPN.
- The memberships of UserLicenses must be validated monthly. Unused user accounts must be removed from the group automatically.
- After the planned migration to Microsoft 365, all users must be signed in to on-premises and cloud-based applications automatically.
- The principle of least privilege must be used.

QUESTION 1

DRAG DROP

You need to prepare the environment for Project1.

You create the Microsoft 365 tenant.

Which three actions should you perform in sequence next? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Configure the required DNS records and verify fabrikam.com as a custom domain.

Implement directory synchronization.

Create a Microsoft Azure Active Directory (Azure AD) tenant.

Modify the Exchange ActiveSync Access Settings.

Run the Hybrid Configuration wizard.

Answer Area

Correct Answer:

Actions

Configure the required DNS records and verify fabrikam.com as a custom domain.

Implement directory synchronization.

Create a Microsoft Azure Active Directory (Azure AD) tenant.

Modify the Exchange ActiveSync Access Settings.

Run the Hybrid Configuration wizard.

Answer Area

Create a Microsoft Azure Active Directory (Azure AD) tenant.
Configure the required DNS records and verify fabrikam.com as a custom domain.
Implement directory synchronization.

To-Do (Plan 2)	<input checked="" type="checkbox"/> Off	<input type="checkbox"/> On
Yammer Enterprise	<input checked="" type="checkbox"/> Off	<input type="checkbox"/> On

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

NoOne

Answer Area

Statements	Yes	No
User1 is licensed to use Microsoft Exchange Online.	<input type="radio"/>	<input type="radio"/>
User1 is licensed to use Microsoft Exchange Online and Microsoft Share Point Online.	<input type="radio"/>	<input type="radio"/>
If you add User3 to Group2, the user will be licensed to use Microsoft Exchange Online.	<input type="radio"/>	<input type="radio"/>

Correct Answer:**Answer Area**

Statements	Yes	No
User1 is licensed to use Microsoft Exchange Online.	<input checked="" type="radio"/>	<input type="radio"/>
User1 is licensed to use Microsoft Exchange Online and Microsoft Share Point Online.	<input type="radio"/>	<input checked="" type="radio"/>
If you add User3 to Group2, the user will be licensed to use Microsoft Exchange Online.	<input type="radio"/>	<input checked="" type="radio"/>

Section: [none]**Explanation****Explanation/Reference:**

Explanation:

Group-based licensing currently does not support groups that contain other groups (nested groups). If you apply a license to a nested group, only the immediate first-level user members of the group have the licenses applied.

References:

<https://docs.microsoft.com/en-us/azure/active-directory/users-groups-roles/licensing-group-advanced>**QUESTION 2**

You have a Microsoft 365 subscription.

You view the service advisories shown in the following exhibit.

Home > Service health

Some services have posted advisories 2018-10-05 08:43(UTC) [View history](#)

All services	Office 365 Portal	1 advisory
Incidents	SharePoint Online	1 advisory
Advisories	Office Subscription	Service is healthy
	Microsoft Intune	Service is healthy
	Microsoft StaffHub	Service is healthy
	Microsoft Teams	Service is healthy
	Mobile Device Management for Office 365	Service is healthy
	Azure Information Protection	Service is healthy
	Exchange Online	Service is healthy

You need to ensure that users who administer Microsoft SharePoint Online can view the advisories to investigate health issues.

Which role should you assign to the users?

- A. SharePoint administrator
- B. Message Center reader
- C. Reports reader
- D. Service administrator

Correct Answer: D

Section: [none]

QUESTION 3

Your network contains an Active Directory forest named contoso.local.

You have a Microsoft 365 subscription.

You plan to implement a directory synchronization solution that will use password hash synchronization.

From the Microsoft 365 admin center, you verify the contoso.com domain name.

You need to prepare the environment for the planned directory synchronization solution.

What should you do first?

- A. From the public DNS zone of contoso.com, add a new mail exchanger (MX) record.
- B. From Active Directory Domains and Trusts, add contoso.com as a UPN suffix.
- C. From the Microsoft 365 admin center, verify the contoso.local domain name.
- D. From Active Directory Users and Computers, modify the UPN suffix for all users.

Correct Answer: B

Section: [none]

Explanation

Explanation/Reference:

QUESTION 4

Your company has a Microsoft 365 subscription.

Your plan to add 100 newly hired temporary users to the subscription next week.

You create the user accounts for the new users.

You need to assign licenses to the new users.

Which command should you run?

- A.

```
$NewStaff = Get-AzureADUser -All -Department "Temp" -UsageLocation "";  
$NewStaff | foreach {Set-AzureADUser -LicenseOptions "contoso:ENTERPRISEPACK"}
```
- B.

```
$NewStaff = Get-AzureADUser -All -Department "Temp" -UsageLocation "US" -Unlicensed;  
$NewStaff | foreach {Set-AzureADUserLicense -AddLicenses "contoso:ENTERPRISEPACK"}
```
- C.

```
$NewStaff = Get-AzureADUser -All -Department "Temp" -UsageLocation "";  
$NewStaff | foreach {Set-AzureADUserLicense -LicenseOptions "contoso:ENTERPRISEPACK"}
```
- D.

```
$NewStaff = Get-AzureADUser -All -Department "Temp" -UsageLocation "US" -Unlicensed;  
$NewStaff | foreach {Set-AzureADUser -AddLicenses "contoso:ENTERPRISEPACK"}
```

Correct Answer: B

QUESTION 5

Your network contains an Active Directory domain and a Microsoft Azure Active Directory (Azure AD) tenant.

The network uses a firewall that contains a list of allowed outbound domains.

You begin to implement directory synchronization.

You discover that the firewall configuration contains only the following domain names in the list of allowed domains:

- *.microsoft.com
- *.office.com

Directory synchronization fails.

You need to ensure that directory synchronization completes successfully.

What is the best approach to achieve the goal? More than one answer choice may achieve the goal. Select the **BEST** answer.

- A. From the firewall, allow the IP address range of the Azure data center for outbound communication.
- B. From Azure AD Connect, modify the Customize synchronization options task.
- C. Deploy an Azure AD Connect sync server in staging mode.
- D. From the firewall, create a list of allowed inbound domains.
- E. From the firewall, modify the list of allowed outbound domains.

Correct Answer: E

Section: [none]

QUESTION 6

Your network contains an on-premises Active Directory forest.

You are evaluating the implementation of Microsoft 365 and the deployment of an authentication strategy.

You need to recommend an authentication strategy that meets the following requirements:

- Allows users to sign in by using smart card-based certificates
- Allows users to connect to on-premises and Microsoft 365 services by using SSO

Which authentication strategy should you recommend?

- A. password hash synchronization and seamless SSO
- B. federation with Active Directory Federation Services (AD FS)
- C. pass-through authentication and seamless SSO

Correct Answer: B

Section: [none]

QUESTION 7

HOTSPOT

Your network contains an on-premises Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD) as shown in the following exhibit.

An on-premises Active Directory user account named Allan Yoo is synchronized to Azure AD. You view Allan's account from Microsoft 365 and notice that his username is set to Allan@contoso.onmicrosoft.com.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
From the Azure portal, you can reset the password of Allan Yoo.	<input type="radio"/>	<input type="radio"/>
From the Azure portal, you can configure the job title of Allan Yoo.	<input type="radio"/>	<input type="radio"/>
From the Azure portal, you can configure the usage location of Allan Yoo.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statements	Yes	No
From the Azure portal, you can reset the password of Allan Yoo.	<input type="radio"/>	<input checked="" type="radio"/>
From the Azure portal, you can configure the job title of Allan Yoo.	<input type="radio"/>	<input checked="" type="radio"/>
From the Azure portal, you can configure the usage location of Allan Yoo.	<input checked="" type="radio"/>	<input type="radio"/>

QUESTION 10

Your network contains an Active Directory domain named adatum.com that is synced to Microsoft Azure Active Directory (Azure AD).

The domain contains 100 user accounts.

The city attribute for all the users is set to the city where the user resides.

You need to modify the value of the city attribute to the three-letter airport code of each city.

What should you do?

- A. From Active Directory Administrative Center, select the Active Directory users, and then modify the Properties settings.
- B. From the Microsoft 365 admin center, select the users, and then use the Bulk actions option.
- C. From Azure Cloud Shell, run the `Get-AzureADUser` and `Set-AzureADUser` cmdlets.
- D. From Windows PowerShell on a domain controller, run the `Get-AzureADUser` and `Set-AzureADUser` cmdlets.

Correct Answer: A

QUESTION 11

HOTSPOT

Your company has a Microsoft Azure Active Directory (Azure AD) tenant that contains the users shown in the following table.

Name	Role
User1	Privileged role administrator
User2	User administrator
User3	Security administrator
User4	Billing administrator

The tenant includes a security group named Admin1. Admin1 will be used to manage administrative accounts.

You need to identify which users can perform the following administrative tasks:

- Create guest user account
- Add User3 to Admin1

Which users should you identify for each task? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Create guest user accounts:

▼
User4 only
User2 only
User3 only
User2 and User3 only
User1, User2 and User3 only
User1, User2, User3, and User4

Add User3 to Admin1:

▼
User4 only
User2 only
User3 only
User2 and User3 only
User1, User2 and User3 only
User1, User2, User3, and User4

Correct Answer:

Answer Area

Create guest user accounts:

▼
User4 only
User2 only
User3 only
User2 and User3 only
User1, User2 and User3 only
User1, User2, User3, and User4

Add User3 to Admin1:

▼
User4 only
User2 only
User3 only
User2 and User3 only
User1, User2 and User3 only
User1, User2, User3, and User4

Explanation

Explanation/Reference:

QUESTION 15

Your company has 10,000 users who access all applications from an on-premises data center.

You plan to create a Microsoft 365 subscription and to migrate data to the cloud.

You plan to implement directory synchronization.

User accounts and group accounts must sync to Microsoft Azure Active Directory (Azure AD) successfully.

You discover that several user accounts fail to sync to Azure AD.

You need to identify which user accounts failed to sync. You must resolve the issue as quickly as possible.

What should you do?

- A. From Active Directory Administrative Center, search for all the users, and then modify the properties of the

user accounts.

- B. Run `idfix.exe`, and then click **Complete**.
- C. From Windows PowerShell, run the `Start-AdSyncCycle -PolicyType Delta` command.
- D. Run `idfix.exe`, and then click **Edit**.

Correct Answer: D

Section: [none]

QUESTION 16

Your network contains an Active Directory forest. The forest contains two domains named `contoso.com` and `adatum.com`.

Your company recently purchased a Microsoft 365 subscription.

You deploy a federated identity solution to the environment.

You use the following command to configure `contoso.com` for federation.

```
Convert-MsolDomainToFederated -DomainName contoso.com
```

In the Microsoft 365 tenant, an administrator adds and verifies the `adatum.com` domain name.

You need to configure the `adatum.com` Active Directory domain for federated authentication.

Which two actions should you perform before you run the Azure AD Connect wizard? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From Windows PowerShell, run the `Convert-MsolDomainToFederated -DomainName contoso.com -SupportMultipleDomain` command.
- B. From Windows PowerShell, run the `New-MsolFederatedDomain -SupportMultipleDomain -DomainName contoso.com` command.
- C. From Windows PowerShell, run the `New-MsolFederatedDomain -DomainName adatum.com` command.
- D. From Windows PowerShell, run the `Update-MSOLFederatedDomain -DomainName contoso.com -SupportMultipleDomain` command.
- E. From the federation server, remove the Microsoft Office 365 relying party trust.

Correct Answer: AE

QUESTION 18

HOTSPOT

Your company has a Microsoft 365 subscription that contains the users shown in the following table.

Name	Role
User1	Global administrator
User2	Security administrator, Guest inviter
User3	None
User4	Password administrator

You need to identify which users can perform the following administrative tasks:

- Modify the password protection policy.
- Create guest user accounts.

Which users should you identify for each task? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Modify the password protection policy:

<input type="text"/>
User1 only
User1 and User2 only
User1, User2, and User4 only
User1, User2, User3, and User4

Create new guest users in Microsoft Azure Active Directory (Azure AD):

<input type="text"/>
User1 only
User1 and User2 only
User1, User2, and User4 only
User1, User2, User3, and User4

Correct Answer:

Answer Area

Modify the password protection policy:

▼
User1 only
User1 and User2 only
User1, User2, and User4 only
User1, User2, User3, and User4

Create new guest users in Microsoft Azure Active Directory (Azure AD):

▼
User1 only
User1 and User2 only
User1, User2, and User4 only
User1, User2, User3, and User4

QUESTION 22

HOTSPOT

Your network contains an on-premises Active Directory domain named contoso.com. The domain contains five domain controllers.

Your company purchases Microsoft 365 and creates a Microsoft Azure Directory (Azure AD) tenant named contoso.onmicrosoft.com.

You plan to establish federation authentication between on-premises Active Directory and the Azure AD tenant by using Active Directory Federation Services (AD FS).

You need to establish the federation.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Action to perform before establishing the federation:

▼
From the Azure portal, add a custom domain name.
From the Azure portal, configure an authentication method.
From a domain controller, install a Pass-through Authentication Agent.
From a domain controller, install Windows Identity Foundation 3.5.

Tool to use to establish the federation:

▼
Active Directory Domains and Trusts
Azure AD Connect
The AD FS console
The Azure portal

Correct Answer:

Answer Area

Action to perform before establishing the federation:

▼
From the Azure portal, add a custom domain name.

QUESTION 27

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com.

You sign up for Microsoft Store for Business.

The tenant contains the users shown in the following table.

Name	Microsoft Store for Business role	Azure AD role
User1	Purchaser	None
User2	Basic Purchaser	None
User3	None	Application administrator
User4	None	Cloud application administrator
User5	None	None

Microsoft Store for Business has the following Shopping behavior settings:

- Allow users to shop is set to **On**.
- Make everyone a Basic Purchaser is set to **Off**.

You need to identify which users can install apps from the Microsoft for Business private store.

Which users should you identify?

- A. A. user1, User2, User3, User4, and User5
- B. User1 only
- C. User1 and User2 only
- D. User3 and User4 only
- E. User1, User2, User3, and User4 only

Correct Answer: C

Section: [none]

Explanation

Explanation/Reference:

Explanation:

Allow users to shop controls the shopping experience in Microsoft Store for Education. When this setting is on, Purchasers and Basic Purchasers can purchase products and services from Microsoft Store for Education.

QUESTION 34
HOTSPOT

You have the Microsoft Azure Active Directory (Azure AD) users shown in the following table.

Name	Member of
User1	Group1
User2	Group2

Your company uses Microsoft Intune.

Several devices are enrolled in Intune as shown in the following table.

Name	Platform	BitLocker Drive Encryption	Member of
Device1	Windows 10	Disabled	Group3
Device2	Windows 10	Disabled	Group4

The device compliance policies in Intune are configured as shown in the following table.

Name	Require BitLocker	Assigned to
Policy1	Not configured	Group3
Policy2	Require	Group4

You create a conditional access policy that has the following settings:

- The Assignments settings are configured as follows:
 - Users and groups: Group1
 - Cloud apps: Exchange Online
 - Conditions: Include All device state, exclude Device marked as compliant
- Access controls is set to Block access.

For each of the following statements, select yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
User1 can access Microsoft Exchange Online from Device1.	<input type="radio"/>	<input type="radio"/>
User1 can access Microsoft Exchange Online from Device2.	<input type="radio"/>	<input type="radio"/>
User2 can access Microsoft Exchange Online from Device2.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statements	Yes	No
User1 can access Microsoft Exchange Online from Device1.	<input checked="" type="radio"/>	<input type="radio"/>
User1 can access Microsoft Exchange Online from Device2.	<input type="radio"/>	<input checked="" type="radio"/>
User2 can access Microsoft Exchange Online from Device2.	<input type="radio"/>	<input checked="" type="radio"/>

Testlet 2

This is a case study. **Case studies are not timed separately. You can use as much exam time as you would like to complete each case.** However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answer and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the **Next** button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the **Question** button to return to the question.

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York.

The offices have the users and devices shown in the following table.

Office	Users	Laptops	Desktops	Mobile devices
Montreal	2,500	2,800	300	3,100
Seattle	1,000	1,100	200	1,500
New York	300	320	30	400

Contoso recently purchased a Microsoft 365 E5 subscription.

Existing Environment

The network contains an Active directory forest named contoso.com and a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com.

You recently configured the forest to sync to the Azure AD tenant.

You add and then verify adatum.com as an additional domain name.

All servers run Windows Server 2016.

All desktop computers and laptops run Windows 10 Enterprise and are joined to contoso.com.

All the mobile devices in the Montreal and Seattle offices run Android. All the mobile devices in the New York office run iOS.

Contoso has the users shown in the following table.

Name	Role
User1	<i>None</i>
User2	<i>None</i>
User3	Customer Lockbox access approver
User4	<i>None</i>

Contoso has the groups shown in the following table.

Name	Type	Membership rule
Group1	Assigned	<i>Not applicable</i>
Group 2	Dynamic	(user.department –eq “Finance”)

Microsoft Office 365 licenses are assigned only to Group2.

The network also contains external users from a vendor company who have Microsoft accounts that use a suffix of @outlook.com.

Requirements

Planned Changes

Contoso plans to provide email addresses for all the users in the following domains:

- East.adatum.com
- Contoso.adatum.com
- Humongousinsurance.com

Technical Requirements

Contoso identifies the following technical requirements:

- All new users must be assigned Office 365 licenses automatically.
- The principle of least privilege must be used whenever possible.

Security Requirements

Contoso identifies the following security requirements:

- Vendors must be able to authenticate by using their Microsoft account when accessing Contoso resources.
- User2 must be able to view reports and schedule the email delivery of security and compliance reports.
- The members of Group1 must be required to answer a security question before changing their password.
- User3 must be able to manage Office 365 connectors.
- User4 must be able to reset User3 password.

QUESTION 1

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to assign User2 the required roles to meet the security requirements.

Solution: From the Office 365 admin center, you assign User2 the Security Reader role. From the Exchange admin center, you assign User2 the Compliance Management role.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: A

Section: [none]

Overview

Fabrikam, Inc. is an electronics company that produces consumer products. Fabrikam has 10,000 employees worldwide.

Fabrikam has a main office in London and branch offices in major cities in Europe, Asia, and the United States.

Existing Environment

Active Directory Environment

The network contains an Active Directory forest named fabrikam.com. The forest contains all the identities used for user and computer authentication.

Each department is represented by a top-level organizational unit (OU) that contains several child OUs for user accounts and computer accounts.

All users authenticate to on-premises applications by signing in to their device by using a UPN format of *username@fabrikam.com*.

Fabrikam does **NOT** plan to implement identity federation.

Network Infrastructure

Each office has a high-speed connection to the Internet.

Each office contains two domain controllers. All domain controllers are configured as a DNS server.

The public zone for fabrikam.com is managed by an external DNS server.

All users connect to an on-premises Microsoft Exchange Server 2016 organization. The users access their email by using Outlook Anywhere, Outlook on the web, or the Microsoft Outlook app for iOS. All the Exchange servers have the latest cumulative updates installed.

All shared company documents are stored on a Microsoft SharePoint Server farm.

Requirements

Planned Changes

Fabrikam plans to implement a Microsoft 365 Enterprise subscription and move all email and shared documents to the subscription.

Fabrikam plans to implement two pilot projects:

- Project1: During Project1, the mailboxes of 100 users in the sales department will be moved to Microsoft 365.
- Project2: After the successful completion of Project1, Microsoft Teams & Skype for Business will be enabled in Microsoft 365 for the sales department users.

Fabrikam plans to create a group named UserLicenses that will manage the allocation of all Microsoft 365 bulk licenses.

Technical Requirements

Fabrikam identifies the following technical requirements:

- All users must be able to exchange email messages successfully during Project1 by using their current email address.
- Users must be able to authenticate to cloud services if Active Directory becomes unavailable.
- A user named User1 must be able to view all DLP reports from the Microsoft 365 admin center.
- Microsoft Office 365 ProPlus applications must be installed from a network share only.
- Disruptions to email address must be minimized.

Application Requirements

Fabrikam identifies the following application requirements:

- An on-premises web application named App1 must allow users to complete their expense reports online.
- The installation of feature updates for Office 365 ProPlus must be minimized.

Security Requirements

Fabrikam identifies the following security requirements:

- After the planned migration to Microsoft 365, all users must continue to authenticate to their mailbox and to SharePoint sites by using their UPN.
- The memberships of UserLicenses must be validated monthly. Unused user accounts must be removed from the group automatically.
- After the planned migration to Microsoft 365, all users must be signed in to on-premises and cloud-based applications automatically.
- The principle of least privilege must be used.

QUESTION 1

HOTSPOT

You need to create the UserLicenses group. The solution must meet the security requirements.

Which group type and control method should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Group type:

▼
Distribution list
Office 365 group
Security group

Control method:

▼
a conditional access policy
a retention policy
an access review
an alert policy

Correct Answer:

Answer Area

Group type:

▼
Distribution list
Office 365 group
Security group

Control method:

▼
a conditional access policy
a retention policy
an access review
an alert policy

Question Set 1

QUESTION 1 HOTSPOT

You have a Microsoft 365 subscription that contains a guest user named User1. User1 is assigned the User administrator role.

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. Contoso.com is configured as shown in the following exhibit.

External collaboration settings

 Save  Discard

Guest users permissions are limited 

Admins and users in the guest inviter role can invite 

Members can invite 

Guests can invite 

Collaboration restrictions

- ☒ Allow invitations to be sent to any domain (most inclusive)
- ☐ Deny invitations to the specified domains
- ☐ Allow invitations only to the specified domains (most restrictive)

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

User1 can [answer choice].

open the Azure portal only
open the Azure portal and view users only
open the Azure portal, view users, and create new guest users only
open the Azure portal, view users, create new users, and create new guest users

All other guest users can [answer choice].

open the Azure portal only
open the Azure portal and view users only
open the Azure portal, view users, and create new guest users only
open the Azure portal, view users, create new users, and create new guest users

Correct Answer:

Answer Area

User1 can [answer choice].

open the Azure portal only
open the Azure portal and view users only
open the Azure portal, view users, and create new guest users only
open the Azure portal, view users, create new users, and create new guest users

All other guest users can [answer choice].

open the Azure portal only
open the Azure portal and view users only
open the Azure portal, view users, and create new guest users only
open the Azure portal, view users, create new users, and create new guest users

QUESTION 2

You have a Microsoft 365 subscription and a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. Contoso.com contains the users shown in the following table.

Name	Type	Role
User1	Member	None
User2	Member	Security administrator, Guest inviter
User3	Member	User administrator
User4	Guest	None

Contoso.com is configured as shown in the following exhibit.

External collaboration settings

 Save  Discard

Guest users permissions are limited ⓘ

☐ Yes ☒ No

Admins and users in the guest inviter role can invite ⓘ

☐ Yes ☒ No

Members can invite ⓘ

☒ Yes ☐ No

Guests can invite ⓘ

☒ Yes ☐ No

Collaboration restrictions

- ☒ Allow invitations to be sent to any domain (most inclusive)
- ☐ Deny invitations to the specified domains
- ☐ Allow invitations only to the specified domains (most restrictive)

You need to ensure that guest users can be created in the tenant.

Which setting should you modify?

- A. Guests can invite.
- B. Guests users permissions are limited.
- C. Members can invite.
- D. Admins and users in the guest inviter role can invite.
- E. Deny invitations to the specified domains.

Correct Answer: D

QUESTION 3

Your company recently purchased a Microsoft 365 subscription.

You enable Microsoft Azure Multi-Factor Authentication (MFA) for all 500 users in the Azure Active Directory (Azure AD) tenant.

You need to generate a report that lists all the users who completed the Azure MFA registration process.

What is the best approach to achieve the goal? More than one answer choice may achieve the goal. Select the **BEST** answer.

- A. From Azure Cloud Shell, run the `Get-AzureADUser` cmdlet.
- B. From Azure Cloud Shell, run the `Get-MsolUser` cmdlet.
- C. From the Azure Active Directory admin center, use the Multi-Factor Authentication – Server Status blade.
- D. From the Azure Active Directory admin center, use Risky sign-ins blade.

Correct Answer: B

QUESTION 4

You have a Microsoft 365 Enterprise subscription.

You have a conditional access policy to force multi-factor authentication when accessing Microsoft SharePoint from a mobile device.

You need to view which users authenticated by using multi-factor authentication.

What should you do?

- A. From the Microsoft 365 admin center, view the Security & Compliance reports.
- B. From the Azure Active Directory admin center, view the user sign-ins.
- C. From the Microsoft 365 admin center, view the Usage reports.
- D. From the Azure Active Directory admin center, view the audit logs.

Correct Answer: B

QUESTION 6

Your network contains an on-premises Active Directory domain named contoso.local. The domain contains five domain controllers.

Your company purchases Microsoft 365 and creates a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com.

You plan to implement pass-through authentication.

You need to prepare the environment for the planned implementation of pass-through authentication.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Modify the email address attribute for each user account.
- B. From the Azure portal, add a custom domain name.
- C. From Active Directory Domains and Trusts, add a UPN suffix.
- D. Modify the User logon name for each user account.
- E. From the Azure portal, configure an authentication method.
- F. From a domain controller, install an Authentication Agent.

Correct Answer: BCD

Section: [none]

Explanation

Explanation/Reference:

QUESTION 7

You have a Microsoft 365 subscription.

Your company deploys an Active Directory Federation Services (AD FS) solution.

You need to configure the environment to audit AD FS user authentication.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From all the AD FS servers, run `auditpol.exe`.
- B. From all the domain controllers, run the `Set-AdminAuditLogConfig` cmdlet and specify the `-LogLevel` parameter.
- C. On a domain controller, install Azure AD Connect Health for AD DS.
- D. From the Azure AD Connect server, run the

Register-AzureADConnectHealthSyncAgent cmdlet.

E. On an AD FS server, install Azure AD Connect Health for AD FS.

Correct Answer: DE

QUESTION 8

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory forest.

You deploy Microsoft 365.

You plan to implement directory synchronization.

You need to recommend a security solution for the synchronized identities. The solution must meet the following requirements:

- Users must be able to authenticate successfully to Microsoft 365 services if Active Directory becomes unavailable.
- Users passwords must be 10 characters or more.

Solution: Implement password hash synchronization and configure password protection in the Azure AD tenant.

Does this meet the goal?

A. Yes

B. No

Correct Answer: B

Section: [none]

Explanation

Explanation/Reference:

QUESTION 9

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory forest.

You deploy Microsoft 365.

You plan to implement directory synchronization.

You need to recommend a security solution for the synchronized identities. The solution must meet the following requirements:

QUESTION 10

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your network contains an Active Directory forest.

You deploy Microsoft 365.

You plan to implement directory synchronization.

You need to recommend a security solution for the synchronized identities. The solution must meet the following requirements:

- Users must be able to authenticate successfully to Microsoft 365 services if Active Directory becomes unavailable.
- Users passwords must be 10 characters or more.

Solution: Implement password hash synchronization and modify the password settings from the Default Domain Policy in Active Directory.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: A

Section: [none]

Explanation

Explanation/Reference:

QUESTION 11

Your company has three main offices and one branch office. The branch office is used for research.

The company plans to implement a Microsoft 365 tenant and to deploy multi-factor authentication.

You need to recommend a Microsoft 365 solution to ensure that multi-factor authentication is enforced only for users in the branch office.

What should you include in the recommendation?

- A. Microsoft Azure Active Directory (Azure AD) conditional access.
- B. Microsoft Azure Active Directory (Azure AD) password protection.
- C. a device compliance policy
- D. a Microsoft Intune device configuration profile

Correct Answer: A

Section: [none]

Explanation

Explanation/Reference:

QUESTION 12

Your network contains an Active Directory domain named contoso.com.

All users authenticate by using a third-party authentication solution.

You purchase Microsoft 365 and plan to implement several Microsoft 365 services.

You need to recommend an identity strategy that meets the following requirements:

- Provides seamless SSO
- Minimizes the number of additional servers required to support the solution
- Stores the passwords of all the users in Microsoft Azure Active Directory (Azure AD)
- Ensures that all the users authenticate to Microsoft 365 by using their on-premises user account

You are evaluating the implementation of federation.

Which two requirements are met by using federation? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. minimizes the number of additional servers required to support the solution
- B. provides seamless SSO
- C. stores the passwords of all the users in Azure AD
- D. ensures that all the users authenticate to Microsoft 365 by using their on-premises user account.

Correct Answer: BD

Section: [none]

Explanation

Explanation/Reference:

QUESTION 13

Your network contains an Active Directory domain named contoso.com. The domain contains five domain controllers.

You purchase Microsoft 365 and plan to implement several Microsoft 365 services.

You need to identify an authentication strategy for the planned Microsoft 365 deployment. The solution must meet the following requirements:

- Ensure that users can access Microsoft 365 by using their on-premises credentials.
- Use the existing server infrastructure only.
- Store all user passwords on-premises only.
- Be highly available.

Which authentication strategy should you identify?

- A. pass-through authentication and seamless SSO
- B. pass-through authentication and seamless SSO with password hash synchronization
- C. password hash synchronization and seamless SSO
- D. federation

Correct Answer: A

Section: [none]

Explanation

Explanation/Reference:

QUESTION 14

Your network contains an on-premises Active Directory domain.

You have a Microsoft 365 subscription.

You implement a directory synchronization solution that uses pass-through authentication.

You configure Microsoft Azure Active Directory (Azure AD) smart lockout as shown in the following exhibit.

Custom smart logout

Lockout threshold ⓘ

Lockout duration in seconds ⓘ

Custom banned passwords

Enforce custom list ⓘ ☒ Yes ☐ No

Custom banned password list ⓘ

password
Pa\$Sw0rd
Pa55w0rd
Contoso

✓

Password protection for Windows Server Active Directory

Enable password protection on Windows Server Active Directory ⓘ ☒ Yes ☐ No

Mode ⓘ ☐ Enforced ☒ Audit

You discover that Active Directory users can use the passwords in the custom banned passwords list.

You need to ensure that banned passwords are effective for all users.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From a domain controller, install the Azure AD Password Protection Proxy.
- B. From a domain controller, install the Microsoft AAD Application Proxy connector.
- C. From Custom banned passwords, modify the Enforce custom list setting.
- D. From Password protection for Windows Server Active Directory, modify the Mode setting.
- E. From all the domain controllers, install the Azure AD Password Protection DC Agent.
- F. From Active Directory, modify the Default Domain Policy.

Correct Answer: ACE

QUESTION 15

HOTSPOT

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com that includes a user named User1.

You enable multi-factor authentication for contoso.com and configure the following two fraud alert settings:

- Set Allow users to submit fraud alerts: On
- Automatically block users who report fraud: On

You need to instruct the users in your organization to use the fraud reporting features correctly.

What should you tell the users to do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

A user can report fraud on her account by:

▼
Typing a special code after receiving an alert call
Sending an email message to an administrator
Using the Microsoft Authenticator app

If User1 reports fraud on his account, the account will be blocked automatically for:

▼
6 hours
1 day
7 days
90 days

Correct Answer:

Answer Area

A user can report fraud on her account by:

▼
Typing a special code after receiving an alert call
Sending an email message to an administrator
Using the Microsoft Authenticator app

If User1 reports fraud on his account, the account will be blocked automatically for:

QUESTION 16

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com.

An external user has a Microsoft account that uses an email address of user1@outlook.com.

An administrator named Admin1 attempts to create a user account for the external user and receives the error message shown in the following exhibit.

Unable to invite user User1@outlook.c... 6:12 PM

You do not have permission to invite external users. Contact your administrator to get permission.

You need to ensure that Admin1 can add the user.

What should you do from the Azure Active Directory admin center?

- A. Add a custom domain name named outlook.com.
- B. Modify the Authentication methods.
- C. Modify the External collaboration settings.
- D. Assign Admin1 the Security administrator role.

Correct Answer: C

QUESTION 18

Your company has a Microsoft 365 subscription that has multi-factor authentication configured for all users.

Users on the network report that they are prompted for multi-factor authentication multiple times a day.

You need to reduce the number of times the users are prompted for multi-factor authentication on their company-owned devices.

What should you do?

- A. Enable the multi-factor authentication trusted IPs setting, and then verify each device as a trusted device.
- B. Enable the remember multi-factor authentication setting, and then verify each device as a trusted device.

- C. Enable the multi-factor authentication trusted IPs setting, and then join all client computers to Microsoft Azure Active Directory (Azure AD).
- D. Enable the remember multi-factor authentication setting, and then join all client computers to Microsoft Azure Active Directory (Azure AD).

Correct Answer: B

QUESTION 19

Your company has a Microsoft 365 subscription and a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com.

An external vendor has a Microsoft account that has a username of user1@outlook.com.

You plan to provide user1@outlook.com with access to several resources in the subscription.

You need to add the external user account to contoso.onmicrosoft.com. The solution must ensure that the external vendor can authenticate by using user1@outlook.com.

What should you do?

- A. From Azure Cloud Shell, run the `New-AzureADUser` cmdlet and specify `-UserPrincipalName user1@outlook.com`.
- B. From the Microsoft 365 admin center, add a contact, and then specify user1@outlook.com as the email address.
- C. From the Azure portal, add a new guest user, and then specify user1@outlook.com as the email address.
- D. From the Azure portal, add a custom domain name, and then create a new Azure AD user and use user1@outlook.com as the username.

Correct Answer: C

Section: [none]

Explanation

QUESTION 20

You have a Microsoft Office 365 subscription that contains several Microsoft SharePoint Online sites.

You discover that users from your company can invite external users to access files on the SharePoint sites.

You need to ensure that the company users can invite only authenticated guest users to the sites.

What should you do?

- A. From the Microsoft 365 admin center, configure a partner relationship.
- B. From SharePoint Online Management Shell, run the `Set-SPOSite` cmdlet.
- C. From the Azure Active Directory admin center, configure a conditional access policy.
- D. From the SharePoint admin center, configure the sharing settings.

Correct Answer: D

Section: [none]

Explanation

Explanation/Reference:

QUESTION 21

Your company has a hybrid deployment of Microsoft 365.

Users authenticate by using pass-through authentication. Several Microsoft Azure AD Connect Authentication Agents are deployed.

You need to verify whether all the Authentication Agents are used for authentication.

What should you do?

- A. From the Azure portal, use the Troubleshoot option on the Pass-through authentication page.
- B. From Performance Monitor, use the #PTA authentications counter.
- C. From the Azure portal, use the Diagnostics settings on the Monitor blade.
- D. From Performance Monitor, use the Kerberos authentications counter.

Correct Answer: A

Section: [none]

Explanation

Save

Cancel

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Statements	Yes	No
File1.txt will be migrated to SharePoint.	<input type="radio"/>	<input type="radio"/>
File2.txt will be migrated to SharePoint.	<input type="radio"/>	<input type="radio"/>
User1 will be denied access to read File3.txt in SharePoint when the migration is complete.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

NoOne

Statements	Yes	No
File1.txt will be migrated to SharePoint.	<input type="radio"/>	<input checked="" type="radio"/>
File2.txt will be migrated to SharePoint.	<input checked="" type="radio"/>	<input type="radio"/>
User1 will be denied access to read File3.txt in SharePoint when the migration is complete.	<input checked="" type="radio"/>	<input type="radio"/>

Section: [none]

Explanation

Explanation/Reference:

Explanation:

Box 1: No

File1.txt will not be migrated as it was created before Jan 1 2019

Box 2: Yes

File2.txt will be migrated as it was created after Jan 1 2019 and was modified after Mar 1 2019.

Box 3: Yes

File permissions will be maintained after the migration.

QUESTION 24

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Microsoft 365 subscription.

You discover that some external users accessed content on a Microsoft SharePoint site. You modify the SharePoint sharing policy to prevent sharing outside your organization.

You need to be notified if the SharePoint policy is modified in the future.

Solution: From the SharePoint site, you create an alert.

Does this meet the goal?

- A. Yes
- B. No

Correct Answer: B

Testlet 2

This is a case study. **Case studies are not timed separately. You can use as much exam time as you would like to complete each case.** However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answer and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the **Next** button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the **Question** button to return to the question.

Overview

Contoso, Ltd. is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York.

The offices have the users and devices shown in the following table.

Office	Users	Laptops	Desktops	Mobile devices
Montreal	2,500	2,800	300	3,100
Seattle	1,000	1,100	200	1,500
New York	300	320	30	400

Contoso recently purchased a Microsoft 365 E5 subscription.

Existing Environment

The network contains an Active directory forest named contoso.com and a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com.

You recently configured the forest to sync to the Azure AD tenant.

You add and then verify adatum.com as an additional domain name.

All servers run Windows Server 2016.

All desktop computers and laptops run Windows 10 Enterprise and are joined to contoso.com.

All the mobile devices in the Montreal and Seattle offices run Android. All the mobile devices in the New York office run iOS.

Contoso has the users shown in the following table.

Name	Role
User1	<i>None</i>
User2	<i>None</i>
User3	Customer Lockbox access approver
User4	<i>None</i>

Contoso has the groups shown in the following table.

Name	Type	Membership rule
Group1	Assigned	<i>Not applicable</i>
Group 2	Dynamic	(user.department –eq “Finance”)

Microsoft Office 365 licenses are assigned only to Group2.

The network also contains external users from a vendor company who have Microsoft accounts that use a suffix of @outlook.com.

Requirements

Planned Changes

Contoso plans to provide email addresses for all the users in the following domains:

- East.adatum.com
- Contoso.adatum.com
- Humongousinsurance.com

Technical Requirements

Contoso identifies the following technical requirements:

- All new users must be assigned Office 365 licenses automatically.
- The principle of least privilege must be used whenever possible.

Security Requirements

Contoso identifies the following security requirements:

- Vendors must be able to authenticate by using their Microsoft account when accessing Contoso resources.
- User2 must be able to view reports and schedule the email delivery of security and compliance reports.
- The members of Group1 must be required to answer a security question before changing their password.
- User3 must be able to manage Office 365 connectors.
- User4 must be able to reset User3 password.

QUESTION 1

You need to meet the security requirement for Group1.

What should you do?

- A. Configure all users to sign in by using multi-factor authentication.
- B. Modify the properties of Group1.
- C. Assign Group1 a management role.
- D. Modify the Password reset properties of the Azure AD tenant.

Correct Answer: D

Section: [none]

Explanation

Explanation/Reference:

References:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/concept-sspr-howitworks>

QUESTION 2

You need to meet the security requirement for the vendors.

What should you do?

- A. From the Azure portal, add an identity provider.
- B. From Azure Cloud Shell, run the `New-AzureADUser` cmdlet and specify the `-UserPrincipalName` parameter.
- C. From the Azure portal, create guest accounts.
- D. From Azure Cloud Shell, run the `New-AzureADUser` cmdlet and specify the `-UserType` parameter.

Correct Answer: C

Section: [none]

Explanation

Explanation/Reference:

Overview

Fabrikam, Inc. is an electronics company that produces consumer products. Fabrikam has 10,000 employees worldwide.

Fabrikam has a main office in London and branch offices in major cities in Europe, Asia, and the United States.

Existing Environment

Active Directory Environment

The network contains an Active Directory forest named fabrikam.com. The forest contains all the identities used for user and computer authentication.

Each department is represented by a top-level organizational unit (OU) that contains several child OUs for user accounts and computer accounts.

All users authenticate to on-premises applications by signing in to their device by using a UPN format of *username@fabrikam.com*.

Fabrikam does **NOT** plan to implement identity federation.

Network Infrastructure

Each office has a high-speed connection to the Internet.

Each office contains two domain controllers. All domain controllers are configured as a DNS server.

The public zone for fabrikam.com is managed by an external DNS server.

All users connect to an on-premises Microsoft Exchange Server 2016 organization. The users access their email by using Outlook Anywhere, Outlook on the web, or the Microsoft Outlook app for iOS. All the Exchange servers have the latest cumulative updates installed.

All shared company documents are stored on a Microsoft SharePoint Server farm.

Requirements

Planned Changes

Fabrikam plans to implement a Microsoft 365 Enterprise subscription and move all email and shared documents to the subscription.

Fabrikam plans to implement two pilot projects:

- Project1: During Project1, the mailboxes of 100 users in the sales department will be moved to Microsoft 365.
- Project2: After the successful completion of Project1, Microsoft Teams & Skype for Business will be enabled in Microsoft 365 for the sales department users.

Fabrikam plans to create a group named UserLicenses that will manage the allocation of all Microsoft 365 bulk licenses.

Technical Requirements

Fabrikam identifies the following technical requirements:

- All users must be able to exchange email messages successfully during Project1 by using their current email address.
- Users must be able to authenticate to cloud services if Active Directory becomes unavailable.
- A user named User1 must be able to view all DLP reports from the Microsoft 365 admin center.
- Microsoft Office 365 ProPlus applications must be installed from a network share only.
- Disruptions to email address must be minimized.

Application Requirements

Fabrikam identifies the following application requirements:

- An on-premises web application named App1 must allow users to complete their expense reports online.
- The installation of feature updates for Office 365 ProPlus must be minimized.

Security Requirements

Fabrikam identifies the following security requirements:

- After the planned migration to Microsoft 365, all users must continue to authenticate to their mailbox and to SharePoint sites by using their UPN.
- The memberships of UserLicenses must be validated monthly. Unused user accounts must be removed from the group automatically.
- After the planned migration to Microsoft 365, all users must be signed in to on-premises and cloud-based applications automatically.
- The principle of least privilege must be used.

QUESTION 1

HOTSPOT

You create the Microsoft 365 tenant.

You implement Azure AD Connect as shown in the following exhibit.

Question Set 1

QUESTION 1 HOTSPOT

You are configuring an enterprise application named TestApp in Microsoft Azure as shown in the following exhibit.

Test Application

Click here to verify application configuration.

Basic Settings

* Internal Url ⓘ

External Url ⓘ

Pre Authentication ⓘ

Connector Group ⓘ

Additional Settings

Backend Application Timeout ⓘ

Use HTTP-Only-Cookie ⓘ

Translate URLs In

Headers ⓘ

Application Body ⓘ

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

To ensure that when users access TestApp, the proxy automatically scans for internal URLs published through the Application Proxy, set [answer choice].

▼
Use Http-Only Cookie to Yes
Translate URLs in Headers to No
Translate URLs in Application Body to Yes

To protect TestApp from Cross-Site Scripting (XSS), set [answer choice].

▼
Use Http-Only Cookie to Yes
Translate URLs in Headers to No
Translate URLs in Application Body to Yes

Correct Answer:

Answer Area

To ensure that when users access TestApp, the proxy automatically scans for internal URLs published through the Application Proxy, set [answer choice].

▼
Use Http-Only Cookie to Yes
Translate URLs in Headers to No
Translate URLs in Application Body to Yes

To protect TestApp from Cross-Site Scripting (XSS), set [answer choice].

QUESTION 2

Your company has an on-premises Microsoft Exchange Server 2013 organization.

The company has 100 users.

The company purchases Microsoft 365 and plans to move its entire infrastructure to the cloud.

The company does **NOT** plan to sync the on-premises Active Directory domain to Microsoft Azure Active Directory (Azure AD).

You need to recommend which type of migration to use to move all email messages, contacts, and calendar items to Exchange Online.

What should you recommend?

- A. cutover migration
- B. IMAP migration
- C. remote move migration
- D. staged migration

Correct Answer: A
Section: [none]

QUESTION 3
HOTSPOT

You have a Microsoft 365 subscription.

You use the Microsoft Office Deployment tool to install Office 365 ProPlus.

You create a configuration file that contains the following settings.

```
<Configuration>
  <Add SourcePath="\\Server1\Office"
    OfficeClientEdition="32"
    Channel="Broad"
    AllowCdnFallback="False">
    <Product ID="0365ProPlusRetail">
      <Language ID="en-us" />
      <Language ID="ja-jp" />
    </Product>
    <Product ID="VisioProRetail">
      <Language ID="en-us" />
      <Language ID="ja-jp" />
    </Product>
  </Add>
  <Remove All="TRUE">
    <Product ID="0365ProPlusRetail">
      <Language ID="en-us" />
    </Product>
    <Product ID="VisioProRetail">
      <Language ID="en-us" />
    </Product>
  </Remove>
  <Updates Enabled="TRUE"
    UpdatePath="\\Server1\Office"
    Channel="Broad" />
  <Display Level="None" AcceptEULA="TRUE" />
  <Logging Level="Standard" Path="%temp%" />
</Configuration>
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

The [answer choice] will be uninstalled from the computers.

▼
MSI version of Microsoft Visio only
C2R version of Microsoft Visio only
MSI and C2R versions of Microsoft Visio

If the Office share on Server1 is missing the Japanese language pack, Office 365 ProPlus will [answer choice].

▼
be installed in English only
be installed in a randomly selected language
NOT be installed

Correct Answer:

Answer Area

The [answer choice] will be uninstalled from the computers.

▼
MSI version of Microsoft Visio only
C2R version of Microsoft Visio only
MSI and C2R versions of Microsoft Visio

If the Office share on Server1 is missing the Japanese language pack, Office 365 ProPlus will [answer choice].

▼
be installed in English only
be installed in a randomly selected language
NOT be installed

QUESTION 4

You create a Microsoft 365 Enterprise subscription.

You assign licenses for all products to all users.

You need to ensure that all Microsoft Office 365 ProPlus installations occur from a network share. The solution must prevent the users from installing Office 365 ProPlus from the Internet.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. From your computer, run `setup.exe /download downloadconfig.xml`.
- B. Create an XML download file.
- C. From the Microsoft 365 admin center, deactivate the Office 365 licenses for all the users.
- D. From each client computer, run `setup.exe /configure installconfig.xml`.
- E. From the Microsoft 365 admin center, configure the Software download settings.

Correct Answer: BDE

Section: [none]

QUESTION 6

Your network contains the servers shown in the following table.

Server name	Software	Configuration
Server1	Windows Server 2008	Domain controller
Server2	Windows Server 2012	Domain controller
Server3	Microsoft Exchange Server 2007	<i>Not applicable</i>
Server4	Microsoft SharePoint Server 2010	<i>Not applicable</i>
Server5	Microsoft Lync Server 2013	<i>Not applicable</i>

You purchase Microsoft 365 Enterprise E5 and plan to move all workloads to Microsoft 365 by using a hybrid identity solution and a hybrid deployment for all workloads.

You need to identify which server must be upgraded before you move to Microsoft 365.

What should you identify?

- A. Server2
- B. Server3
- C. Server5
- D. Server1
- E. Server4

Correct Answer: B

Section: [none]

Explanation

Explanation/Reference:

QUESTION 7

Your on-premises network contains five file servers. The file servers host shares that contain user data.

You plan to migrate the user data to a Microsoft 365 subscription.

You need to recommend a solution to import the user data into Microsoft OneDrive.

What should you include in the recommendation?

- A. Configure the settings of the OneDrive client on your Windows 10 device.
- B. Configure the Sync settings in the OneDrive admin center.
- C. Run the SharePoint Hybrid Configuration Wizard.
- D. Run the SharePoint Migration Tool.

Correct Answer: D

QUESTION 8

Your network contains two Active Directory forests. Each forest contains two domains. All client computers run Windows 10 and are domain-joined.

You plan to configure Hybrid Azure AD join for the computers.

You create a Microsoft Azure Active Directory (Azure AD) tenant.

You need to ensure that the computers can discover the Azure AD tenant.

What should you create?

- A. a new computer account for each computer
- B. a new service connection point (SCP) for each domain
- C. a new trust relationship for each forest
- D. a new service connection point (SCP) for each forest

Correct Answer: D

Section: [none]

Explanation

Explanation/Reference:

References:

<https://docs.microsoft.com/en-us/azure/active-directory/devices/hybrid-azuread-join-manual>

QUESTION 9

You have an on-premises Microsoft SharePoint Server 2016 environment.

You create a Microsoft 365 tenant.

You need to migrate some of the SharePoint sites to SharePoint Online. The solution must meet the following requirements:

- Microsoft OneDrive sites must redirect users to online content.
- Users must be able to follow both on-premises and cloud-based sites.
- Users must have a single SharePoint profile for both on-premises and on the cloud.
- When users search for a document by using keywords, the results must include online and on-premises results.

From the SharePoint Hybrid Configuration Wizard, you select the following features:

- Hybrid business to business (B2B) sites
- Hybrid OneDrive
- Hybrid Search

Which two requirements are met by using the SharePoint Hybrid Configuration Wizard features? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. Users must have a single SharePoint profile for both on-premises and on the cloud.

- B. OneDrive sites must redirect users to online content.
- C. Users must be able to follow both on-premises and cloud-based sites.
- D. When users search for a document by using keywords, the results must include online and on-premises results.

Correct Answer: BD

Section: [none]

QUESTION 10

DRAG DROP

You have several Microsoft SharePoint document libraries in your on-premises environment.

You have a Microsoft 365 tenant that has directory synchronization implemented.

You plan to move all the document libraries to SharePoint Online.

You need to recommend a migration strategy for the document libraries.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions	Answer Area
Use the SharePoint Migration Tool to migrate the SharePoint data.	
Create new SharePoint sites.	
Run azcopy.exe to migrate the SharePoint data.	
Create a Microsoft Azure Storage account.	
Create new SharePoint libraries.	

Correct Answer:

Actions

Use the SharePoint Migration Tool to migrate the SharePoint data.
Create new SharePoint sites.
Run azcopy.exe to migrate the SharePoint data.
Create a Microsoft Azure Storage account.
Create new SharePoint libraries.

Answer Area

Create new SharePoint sites.
Create new SharePoint libraries.
Use the SharePoint Migration Tool to migrate the SharePoint data.

QUESTION 12

Your organization has an on-premises Microsoft Exchange Server 2016 organization. The organization is in the company's main office in Melbourne. The main office has a low-bandwidth connection to the Internet.

The organization contains 250 mailboxes.

You purchase a Microsoft 365 subscription and plan to migrate to Exchange Online next month.

In 12 months, you plan to increase the bandwidth available for the Internet connection.

You need to recommend the best migration strategy for the organization. The solution must minimize administrative effort.

What is the best recommendation to achieve the goal? More than one answer choice may achieve the goal. Select the **BEST** answer.

- A. network upload
- B. cutover migration
- C. hybrid migration
- D. staged migration

Correct Answer: C

Section: [none]

Explanation

QUESTION 13

HOTSPOT

Your company has 500 client computers that run Windows 10.

You plan to deploy Microsoft Office 365 ProPlus to all the computers.

You create the following XML file for the planned deployment.

```
<Configuration>
  <Add OfficeClientEdition="64" Channel="Broad" ForceUpgrade="TRUE">
    <Product ID="0365ProPlusRetail">
      <Language ID="en-us"/>
      <ExcludeApp ID="Groove"/>
      <ExcludeApp ID="Publisher"/>
    </Product>
  </Add>
  <Updates Enabled="TRUE" Channel="Broad" Deadline="03/31/2019, 00:00"
UpdatePath="\\sccm\updates"/>
  <Display Level="Full" AcceptEULA="TRUE"/>
  <Property Name="FORCEAPPSHUTDOWN" Value="TRUE"/>
  <Property Name="SharedComputerLicensing" Value="0"/>
  <Property Name="PinIconsToTaskbar" Value="TRUE"/>
</Configuration>
```

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

When the installation is complete [answer choice].

▼
all users will be prompted to accept the EULA
all users will be prompted to install several updates
all semi-channel updates will be installed automatically

Office 365 ProPlus will [answer choice].

▼
include Microsoft OneDrive for Business and Microsoft Outlook only
be installed on all the computers
be installed only on the computers that run a 64-bit version of Windows 10

Correct Answer:

Answer Area

When the installation is complete [answer choice].

all users will be prompted to accept the EULA
all users will be prompted to install several updates
all semi-channel updates will be installed automatically

Office 365 ProPlus will [answer choice].

include Microsoft OneDrive for Business and Microsoft Outlook only
be installed on all the computers
be installed only on the computers that run a 64-bit version of Windows 10

QUESTION 14

Your company has a Microsoft Azure Active Directory (Azure AD) directory tenant named contoso.onmicrosoft.com.

All users have client computers that run Windows 10 Pro and are joined to Azure AD.

The company purchases a Microsoft 365 E3 subscription.

You need to upgrade all the computers to Windows 10 Enterprise. The solution must minimize administrative effort.

You assign licenses from the Microsoft 365 admin center.

What should you do next?

- A. Add a custom domain name to the subscription.
- B. Deploy Windows 10 Enterprise by using Windows Autopilot.
- C. Create provisioning package, and then deploy the package to all the computers.
- D. Instruct all the users to log off of their computer, and then to log in again.

Correct Answer: B

Section: [none]

Explanation

Explanation/Reference:

Explanation:

With Windows Autopilot the user can set up pre-configure devices without the need consult their IT administrator.

QUESTION 15

Your company has a Microsoft 365 subscription.

You plan to move several archived PST files to Microsoft Exchange Online mailboxes.

You need to create an import job for the PST files.

Which three actions should you perform before you create the import job? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a Microsoft Azure Storage account.
- B. From Security & Compliance, retrieve the SAS key.
- C. Run `azcopy.exe` to copy the PST files to Microsoft Azure Storage
- D. Use Microsoft Azure Storage Explorer to copy the PST files to Azure Storage.
- E. Create a PST import mapping file.

Correct Answer: BCE

Section: [none]

Explanation

Explanation/Reference:

QUESTION 19

Your on-premises network contains the web applications shown in the following table.

Name	Hosted on server
App1	Web1
App2	Web2
App3	Web3
App4	Web4

You purchase Microsoft 365, and then implement directory synchronization.

You plan to publish the web applications.

You need to ensure that all the applications are accessible by using the My Apps portal. The solution must minimize administrative effort.

What should you do first?

- A. Deploy one conditional access policy.
- B. Deploy one Application Proxy connector.
- C. Create four application registrations.
- D. Create a site-to-site VPN from Microsoft Azure to the on-premises network.

Correct Answer: B

Section: [none]

Explanation

Explanation/Reference:

QUESTION 20

Your network contains an Active Directory domain named contoso.com.

You have a Microsoft 365 subscription.

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.onmicrosoft.com.

You implement directory synchronization.

The developers at your company plan to build an app named App1. App1 will connect to the Microsoft Graph API to provide access to several Microsoft Office 365 services.

You need to provide the URL for the authorization endpoint that App1 must use.

What should you provide?

- A. <https://login.microsoftonline.com/>
- B. <https://contoso.com/contoso.onmicrosoft.com/app1>
- C. <https://login.microsoftonline.com/contoso.onmicrosoft.com/>
- D. <https://myapps.microsoft.com>

Correct Answer: C

QUESTION 25

HOTSPOT

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com.

A user named User1 has files on a Windows 10 device as shown in the following table.

Name	Text in file
File1.docx	Importing and exporting is easy. For import, you need a source, and for export, you need a destination
File2.docx	You must declare what you want to import. Dangerous items cannot be imported. If you want to import valuables, you must pay customs.
File3.docx	IM are initials for instant messaging. You can use Microsoft Skype for IM, but there are also other IM programs.

In Azure Information Protection, you create a label named Label1 that is configured to apply automatically. Label1 is configured as shown in the following exhibit.

Condition: Condition1

Default Directory - Azure Information Protection

Save

Discard

Delete

Choose the type of condition

Information Types

Custom

* Name

Condition1

* Match exact phrase or pattern

im

Match as a regular expression

Off

On

Match with case sensitivity

Off

On

* Maximum number of occurrences

2

Count occurrences with unique value only

Off

On

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
Label1 applies to File1.docx.	<input type="radio"/>	<input type="radio"/>
Label1 applies to File2.docx.	<input type="radio"/>	<input type="radio"/>
Label1 applies to File3.docx.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statements	Yes	No
Label1 applies to File1.docx.	<input type="radio"/>	<input checked="" type="radio"/>
Label1 applies to File2.docx.	<input checked="" type="radio"/>	<input type="radio"/>
Label1 applies to File3.docx.	<input type="radio"/>	<input checked="" type="radio"/>

Section: [none]

Explanation

Explanation/Reference:

Explanation:

The phrase to match is "im" and it is case sensitive. The phrase must also appear at least twice.

Box 1: No

File1.docx contain the word "import" once only

Box 2: Yes

File2.docx contains two occurrences of the word "import" as well as the word "imported"

Box 3: No

File3.docx contains "IM" but his is not the correct letter case.

QUESTION 26

HOTSPOT

You have a Microsoft 365 subscription that uses a default named contoso.com.

Three files were created on February 1, 2019, as shown in the following table.

Name	Stored in
File1	Microsoft OneDrive
File2	A Microsoft SharePoint library
File3	Microsoft Exchange Online email

On March 1, 2019, you create two retention labels named Label1 and label2.

The settings for Label1 are configured as shown in the Label1 exhibit. (Click the **Label1** tab.)

Label 1

Label settings

Retention (i)

On

When this label is applied to content...

☒ Retain the content (i)

For this long... ▼	2	years ▼
--------------------	---	---------

Do you want us to delete it after this time?

☐ Delete the content automatically. (i)

☒ Trigger a disposition review. (i)

Notify these people when there are items ready to review

User1@sk180818.onmicrosoft.com x

☐ Nothing. Leave the content as is. (i)

☐ Don't retain the content. Just delete it if it's older than (i)

1	years ▼
---	---------

Retain or delete the content based on

when it was created ▼

(i)

Label classification

☐ Use label to classify content as a "Record" (i)

The settings for Label2 are configured as shown in the Label1 exhibit. (Click the **Label2** tab.)

Label 2

Label settings

Retention (i)

On

When this label is applied to content...

☐ Retain the content (i)

For this long... years

☒ Don't retain the content. Just delete it if it's older than (i)

years

Retain or delete the content based on (i)

You apply the retention labels to Exchange email, SharePoint sites, and OneDrive accounts.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
File1 will be deleted automatically on February1, 2020.	<input type="radio"/>	<input type="radio"/>
If User1 does not complete the disposition review within 90 days of receiving the notification, File2 will be deleted automatically after February 1, 2021.	<input type="radio"/>	<input type="radio"/>
File3 will be deleted automatically after February 1, 2021.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statements	Yes	No
File1 will be deleted automatically on February1, 2020.	<input type="radio"/>	<input checked="" type="radio"/>
If User1 does not complete the disposition review within 90 days of receiving the notification, File2 will be deleted automatically after February 1, 2021.	<input type="radio"/>	<input checked="" type="radio"/>
File3 will be deleted automatically after February 1, 2021.	<input type="radio"/>	<input checked="" type="radio"/>

Section: [none]

Explanation

Explanation/Reference:

Explanation:

Box 1: No
Retention overrides deletion.

Box 2: No
Content in a document library will be moved to the first-stage Recycle Bin within 7 days of disposition, and then permanently deleted another 93 days after that. Thus 100 days in total.

Box 3: No
Items in an Exchange mailbox will be permanently deleted within 14 days of disposition.

QUESTION 27

HOTSPOT

You have retention policies in Microsoft 365 as shown in the following table.

Name	Location
Policy1	OneDrive accounts
Policy2	Exchange email, Exchange public folders, Office 365 groups, OneDrive accounts, SharePoint sites

Policy1 is configured as shown in the Policy1 exhibit. (Click the **Policy1** tab.)

Policy1

Decide if you want to retain content, delete it, or both

Do you want to retain content? ⓘ

☐ Yes, I want to retain it ⓘ

For this long... ▼ 7 years ▼

☒ No, just delete content that's older than ⓘ

1 years ▼

Delete the content based on when it was created ▼ ⓘ

Need more options?

☐ Use advanced retention settings ⓘ

Back

Next

Cancel

Policy1 is configured as shown in the Policy2 exhibit. (Click the **Policy2** tab.)

Policy2

Decide if you want to retain content, delete it, or both

Do you want to retain content? ⓘ

☒ Yes, I want to retain it ⓘ

For this long... ▼ 4 years ▼

Retain the content based on when it was created ▼ ⓘ

Do you want us to delete it after this time? ⓘ

☐ Yes ☒ No

☐ No, just delete content that's older than ⓘ

2 years ▼

Need more options?

☐ Use advanced retention settings ⓘ

QUESTION 31

HOTSPOT

You have a Microsoft 365 subscription.

You have a group named Support. Users in the Support group frequently send email messages to external users.

The manager of the Support group wants to randomly review messages that contain attachments.

You need to provide the manager with the ability to review messages that contain attachments sent from the Support group users to external users. The manager must have access to only 10 percent of the messages.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

To meet the goal for the manager, create:

A label policy
A retention policy
A supervisor policy
An alert policy
MyAnalytics

To review the messages, the manager must use:

A message trace
An eDiscovery case
MyAnalytics
Outlook Web App

Correct Answer:

Answer Area

To meet the goal for the manager, create:

A label policy
A retention policy
A supervisor policy
An alert policy
MyAnalytics

To review the messages, the manager must use:

A message trace
An eDiscovery case
MyAnalytics
Outlook Web App

QUESTION 32

HOTSPOT

Your network contains an Active Directory domain named contoso.com. The domain contains the file servers shown in the following table.

Name	IP address
Server1	192.168.1.10
Server2	192.168.2.10

A file named File1.abc is stored on Server1. A file named File2.abc is stored on Server2. Three apps named App1, App2, and App3 all open files that have the .abc file extension.

You implement Windows Information Protection (WIP) by using the following configurations:

- Exempt apps: App2
- Protected apps: App1
- Windows Information Protection mode: Block
- Network boundary: IPv4 range of 192.168.1.1-192.168.1.255

You need to identify the apps from which you can open File1.abc

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
You can open File1.abc in App1.	<input type="radio"/>	<input type="radio"/>
You can open File1.abc in App2.	<input type="radio"/>	<input type="radio"/>
You can open File1.abc in App3.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statements	Yes	No
You can open File1.abc in App1.	<input checked="" type="radio"/>	<input type="radio"/>
You can open File1.abc in App2.	<input checked="" type="radio"/>	<input type="radio"/>
You can open File1.abc in App3.	<input type="radio"/>	<input checked="" type="radio"/>

QUESTION 34

You have a Microsoft 365 subscription.

Your company purchases a new financial application named App1.

From Cloud Discovery in Microsoft Cloud App Security, you view the Discovered apps page and discover that many applications have a low score because they are missing information about domain registration and consumer popularity.

You need to prevent the missing information from affecting the score.

What should you configure from the Cloud Discover settings?

- A. App tags
- B. Score metrics
- C. Organization details
- D. Default behavior

Correct Answer: A

Section: [none]

Testlet 2

This is a case study. **Case studies are not timed separately. You can use as much exam time as you would like to complete each case.** However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answer and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study

To display the first question in this case study, click the **Next** button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the **Question** button to return to the question.

Overview

Fabrikam, Inc. is an electronics company that produces consumer products. Fabrikam has 10,000 employees worldwide.

Fabrikam has a main office in London and branch offices in major cities in Europe, Asia, and the United States.

Existing Environment

Active Directory Environment

The network contains an Active Directory forest named fabrikam.com. The forest contains all the identities used for user and computer authentication.

Each department is represented by a top-level organizational unit (OU) that contains several child OUs for user accounts and computer accounts.

All users authenticate to on-premises applications by signing in to their device by using a UPN format of *username@fabrikam.com*.

Fabrikam does **NOT** plan to implement identity federation.

Network Infrastructure

Each office has a high-speed connection to the Internet.

Each office contains two domain controllers. All domain controllers are configured as a DNS server.

The public zone for fabrikam.com is managed by an external DNS server.

All users connect to an on-premises Microsoft Exchange Server 2016 organization. The users access their email by using Outlook Anywhere, Outlook on the web, or the Microsoft Outlook app for iOS. All the Exchange servers have the latest cumulative updates installed.

All shared company documents are stored on a Microsoft SharePoint Server farm.

Requirements

Planned Changes

Fabrikam plans to implement a Microsoft 365 Enterprise subscription and move all email and shared documents to the subscription.

Fabrikam plans to implement two pilot projects:

- Project1: During Project1, the mailboxes of 100 users in the sales department will be moved to Microsoft 365.
- Project2: After the successful completion of Project1, Microsoft Teams & Skype for Business will be enabled in Microsoft 365 for the sales department users.

Fabrikam plans to create a group named UserLicenses that will manage the allocation of all Microsoft 365 bulk licenses.

Technical Requirements

Fabrikam identifies the following technical requirements:

- All users must be able to exchange email messages successfully during Project1 by using their current email address.
- Users must be able to authenticate to cloud services if Active Directory becomes unavailable.
- A user named User1 must be able to view all DLP reports from the Microsoft 365 admin center.
- Microsoft Office 365 ProPlus applications must be installed from a network share only.
- Disruptions to email address must be minimized.

Application Requirements

Fabrikam identifies the following application requirements:

- An on-premises web application named App1 must allow users to complete their expense reports online.
- The installation of feature updates for Office 365 ProPlus must be minimized.

Security Requirements

Fabrikam identifies the following security requirements:

- After the planned migration to Microsoft 365, all users must continue to authenticate to their mailbox and to SharePoint sites by using their UPN.
- The memberships of UserLicenses must be validated monthly. Unused user accounts must be removed from the group automatically.
- After the planned migration to Microsoft 365, all users must be signed in to on-premises and cloud-based applications automatically.
- The principle of least privilege must be used.

QUESTION 1

HOTSPOT

You need to meet the application requirements for the Office 365 ProPlus applications.

You create an XML file that contains the following settings.

```
<Add SourcePath="\\Server1\OfficeSoftware"
      OfficeClientEdition="32"
      Channel="Targeted"
      AllowCdnFallback="True">
  <Product ID="O365ProPlusRetail">
    <Language ID="MatchOS" Fallback="en-us" />
  </Product>
</Add>
```

Use the drop-down menus to select the answer choice that completes each statement based on the information

presented in the graphic.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Office 365 ProPlus feature updates will be installed [answer choice].

▼
automatically once a year
automatically twice a year
manually

To meet the technical requirement for Office 365 ProPlus, [answer choice].

▼
Change SourcePath to DownloadPath.
Set the value for AllowCdnFallback to False.
Add SCKCacheOverride=1 to the Product section.

Correct Answer:

Answer Area

Office 365 ProPlus feature updates will be installed [answer choice].

▼
automatically once a year
automatically twice a year
manually

To meet the technical requirement for Office 365 ProPlus, [answer choice].

▼
Change SourcePath to DownloadPath.
Set the value for AllowCdnFallback to False.
Add SCKCacheOverride=1 to the Product section.
